

Acutonics® I in Mexico Sound Gates to Meridian Harmonics

"A Harmonic Approach to Healing"

Upcoming Dates 4-day Workshop:

October 7, 8, 9 & 10, 2011

Time: 9:00 am to 5:00 pm

Place: Todos Santos, BSC

"Sound has the power to heal our wounds, ignite our spirit, change our consciousness, and reunite us with the divine harmonies and rhythms of the universe." - Donna Carey, visionary of The Acutonics Healing System

Acutonics is a natural, non-invasive therapeutic approach to healing through sound, at the forefront in the new paradigm of harmonic medicine. It can be used for self-treatment as well as an adjunct therapy to compliment other healing modalities.

Acutonics Level I introduces you to the theory & techniques of the Acutonics® Healing System. This workshop explores the energetics of sound, the human body as sound resonator, meridians and points as pathways for sound, and the concepts of cellular memory, sound imprinting, reformatting and much more.

You will learn to apply tuning forks using sound intervals based on the orbital properties of the Earth, Moon and Sun to treat a wide variety of physical, psychological and spiritual conditions. Come explore the art of applying sound to sacred gateways allowing access to ultimate potential, vitality and greater consciousness for yourself and your clients.

Lynn Wedekind, MEd

integrates decades of professional experience in the medical, music and sound healing arts arena into her work as a Certified Senior Teacher and Practitioner of the Acutonics Healing System. She is certified to teach Levels I - IV and Sedna. www.tuneintuit.com.

"When I discovered Acutonics®, I knew I had found the way to combine my love of science and medicine with my passion for music and sound. My clients report profoundly transformational and highly effective results. They also report achieving results more quickly with tuning forks than they have had with needles from acupuncture. Miracles in healing do exist through the use of conscious intention with sound with the Acutonics Healing System. Students often express enjoying the meditative and soul-expanding aspects of the course as much as diving deeply into the practical experiential parts. Acutonics is a gentle yet potent adjunct therapy for body workers, acupuncturists, nurses, physicians, psychotherapists and energy workers who wish to expand the art, spirit and effectiveness of their practice."
